

# Create Node-RED Service

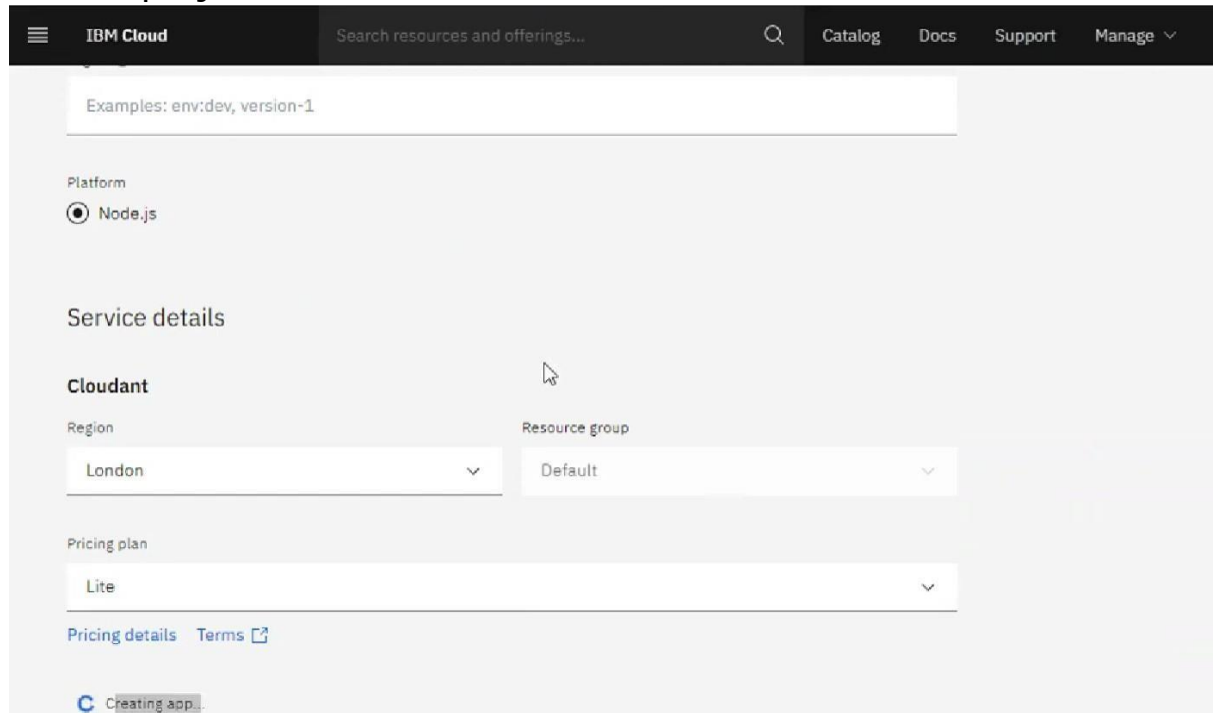

**Aim:** To create a web application create a Node-RED service.

Steps followed:

- Navigated to the App creation page

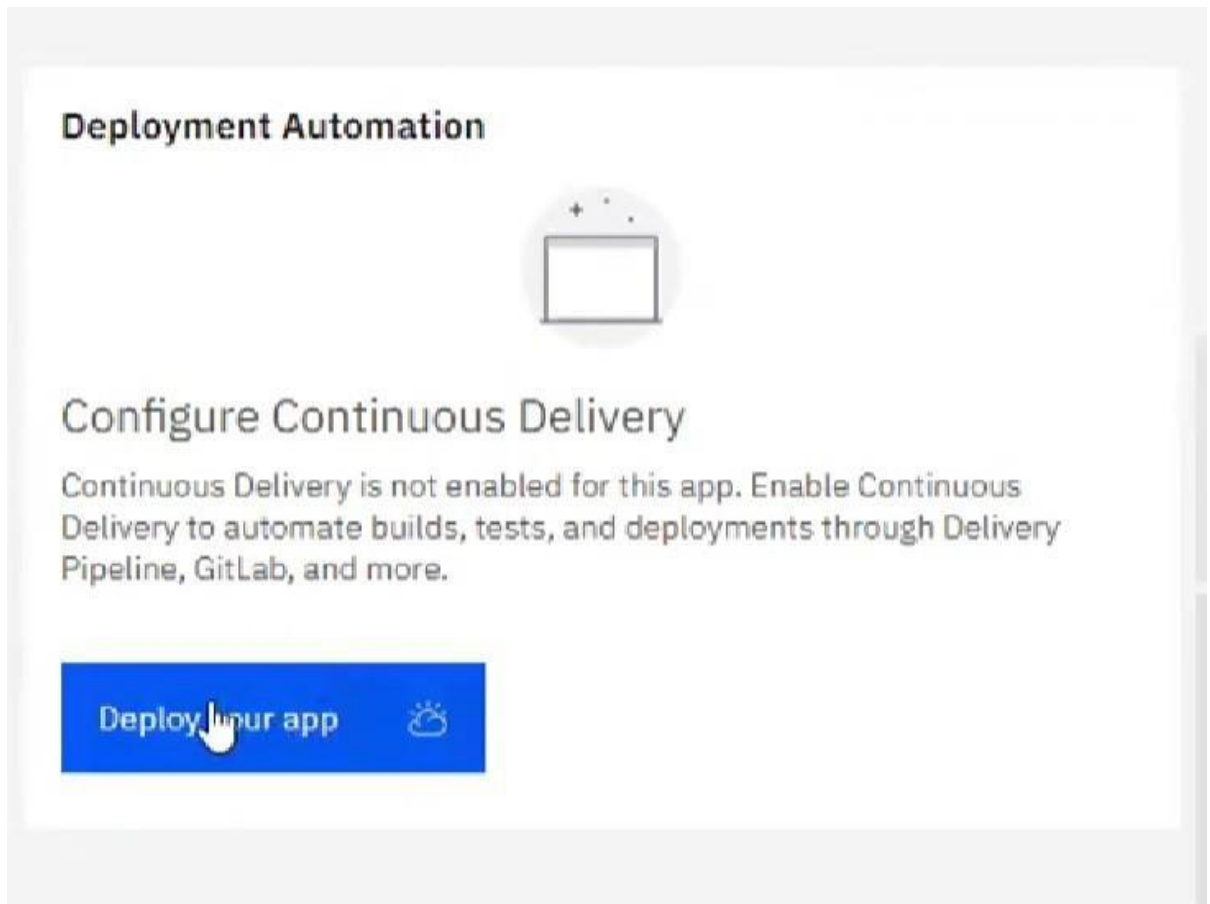

- Entered project details and clicked on create

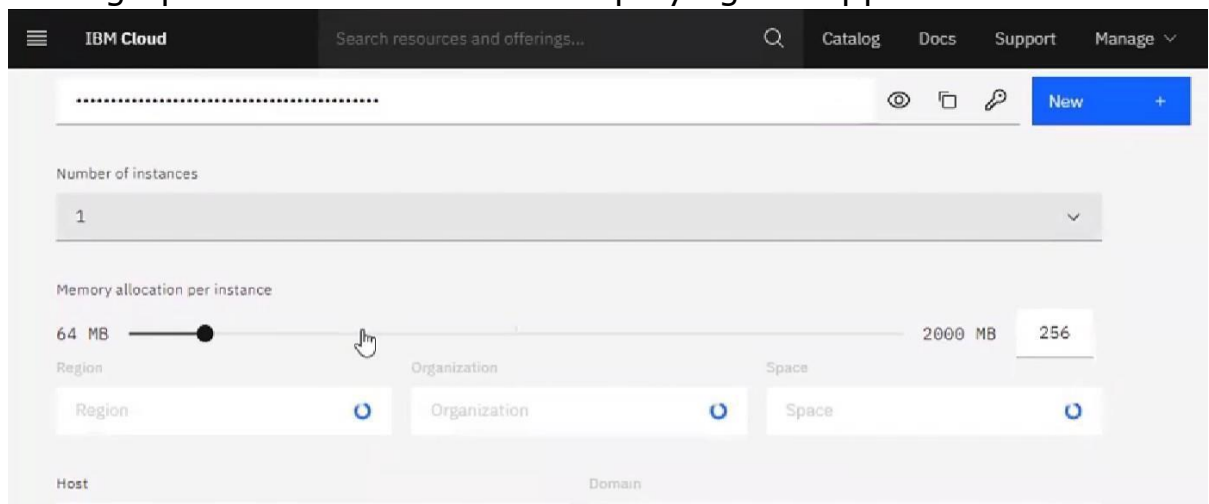

Clicking on the "Deploy your App" Button

- 

- Setting up the environment and deploying the app

Successfully deployed the app

- Welcomed by the instance editor

## Welcome to your new Node-RED instance on IBM Cloud

We know you're eager to start wiring up your flows, but first there are a couple of tasks you should do:

- Secure your Node-RED editor
- Learn how to install additional nodes

### Setting up credentials

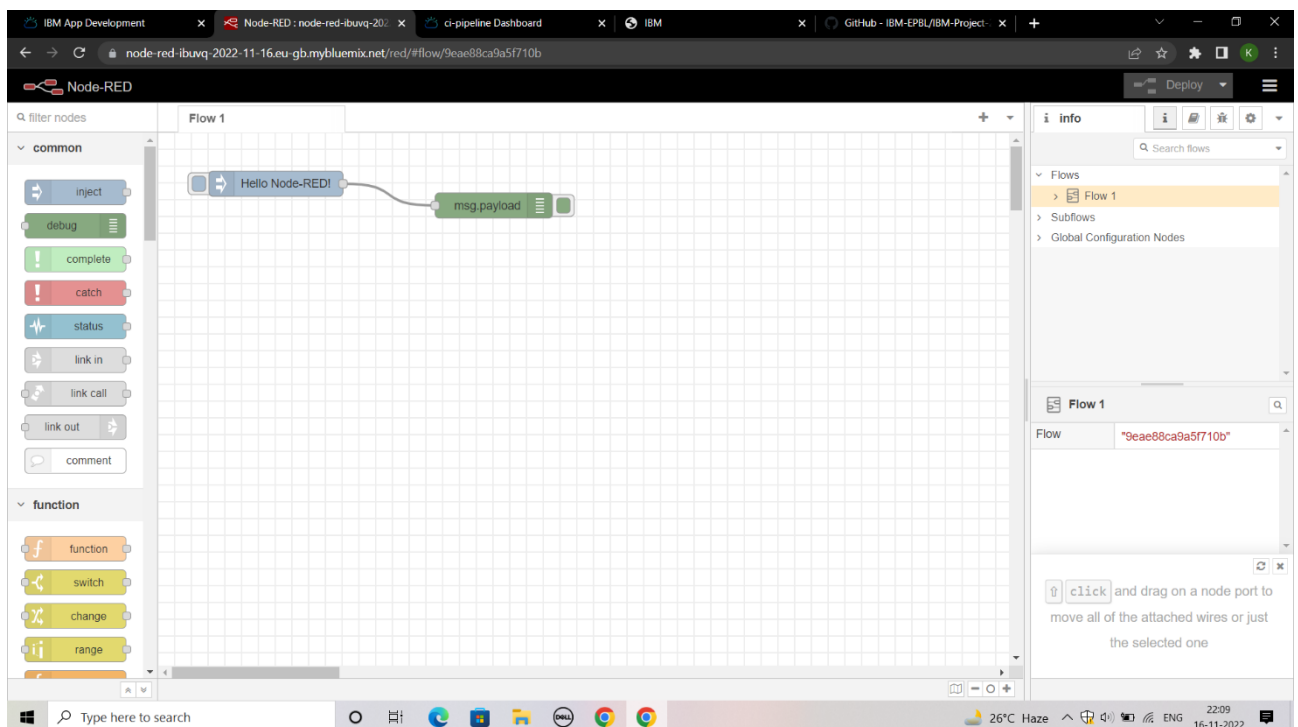

☐ Secure your editor so only authorised users can access it

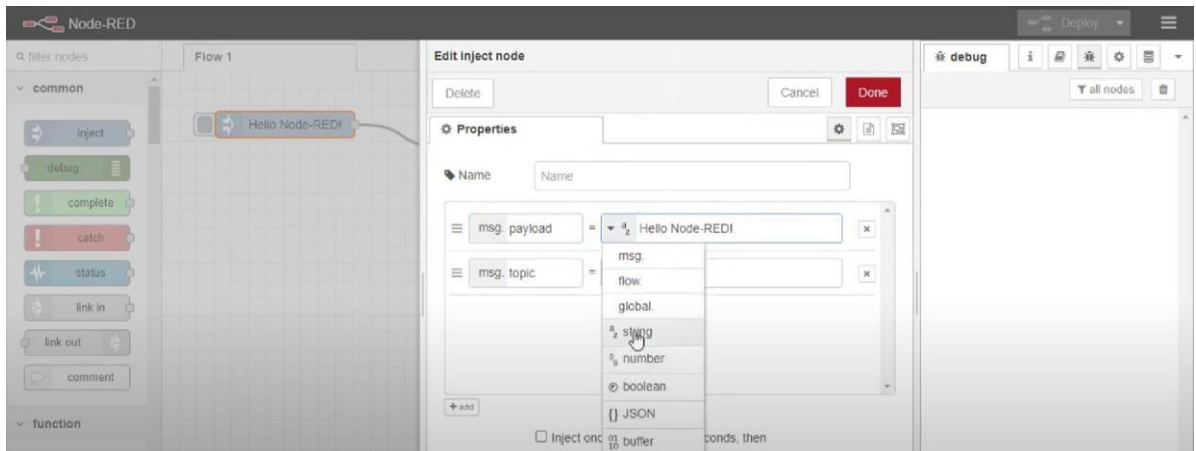

☒ *Not recommended:* Allow anyone to access the editor and make changes

Your editor will not be secured. Anyone with the URL will be able to access your flows, data and bound services.

☒ Tick this box to confirm you want your editor to be insecure

Dragged and dropped components into the editor  
Editing some values of the properties

- Successfully deployed the app

**Result:** Successfully created a NodeRED service on IBM Cloud
